## TASK 1

**LEVEL-0** : bandit0

**LEVEL-1** : ZjLjTmM6FvvyRnrb2rfNWOZOTa6ip5lf

**LEVEL-2** : 263JGJPfgU6LtdEvgfWU1XP5yac29mFx

{an important factor here is "-" comes under the category of STDIN/STDOUT like | so we have to write the entire file path for ti to work properly again.}

**LEVEL-3** : MNk8KNH3Usiio41PRUEoDFPqfxLPISmx

All you have to do is use /\*

**LEVEL-4** : 2WmrDFRmJlq3IPxneAaMGhap0pFhF3NJ

Significantly tougher had to use ls -a to find the name of the hidden file and then use cat and the file name to open it.

**LEVEL-5** : 4oQYVPkxZOOEOO5pTW81FB8j8lxXGUQw
